PROFESSIONAL SUMMARY

An aspiring Full-Stack Engineer with a focus on UI/UX design, AI integration, and API development — someone who wants to build things and turn ideas into real-world solutions.

EDUCATION

National Teachers College

BS Information Technology

Metro Manila

2026

General Weighted Average (GWA): 1.25

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Operating Systems, Database Systems, Web & Mobile Development

WORK EXPERIENCE

Grandline Maritime Training and Development Center

Software Engineer

Kalaw, Manila

Feb 2026 – May 2026

- Minimized technical downtime by 15% by proactively troubleshooting and maintaining a fleet of 5 hardware and audiovisual devices, ensuring 100% operational readiness for daily business activities.
- Developed high-performing, responsive web applications using React, translating complex wireframes into intuitive UIs that improved user engagement by 20% and reduced development time by 30% through component modularity.
- Optimized front-end performance, reducing page load time by 6 seconds through the strategic use of React hooks and efficient state management, resulting in a more seamless user experience.

PROJECTS

Sweeppress: A E-commerce And Supply Chain Platform (Capstone)

2025

- Engineered a scalable, full-stack supply chain and e-commerce platform for Hue Marketing, utilizing RBAC (Role-Based Access Control) to enforce data integrity and secure multi-tier user permissions.
- Optimized user accessibility by implementing offline route caching using Service Workers, enabling seamless route navigation without active data connectivity, reducing dependency on network reliability.

Dough-Re-Mi: Web-based ERP & E-commerce System

2026

- Developed a centralized ERP and e-commerce ecosystem to digitize bakery operations, featuring a secure authentication framework and granular access control for efficient management.
- Enhanced customer engagement and operational efficiency by deploying an AI-powered chatbot to automate inquiry handling and streamline the ordering process.

Neo Chess Dx: 8-bit Chess game

2026

- Developed a high-performance chess engine with React.js, incorporating custom game logic that supports both local multiplayer and AI-opponent modes with adjustable difficulty levels.
- Enhanced user retention through high-fidelity visual feedback, utilizing CSS animations for piece captures and integrating a precision game timer to replicate competitive tournament-grade gameplay.

CERTIFICATIONS

- Cisco - CSS Essentials, JavaScript Essentials 1 & 2, Python Essentials 1 and 2, Introduction to Modern AI
- IBM - Introduction to Software Engineering, Developing Front-End Apps with React, Developing Back-End Apps with Node.js and Express
- DICT - Introduction to Artificial Intelligence and Prompt Engineering Frameworks, Basic Graphic Design Using AI-Powered Canva, Artificial Intelligence For Sustainable Development Webinar
- Coursera - Ethical Issues in AI and Professional Ethics, The Sustainable Development Goals — A global, transdisciplinary vision for the future

ADDITIONAL

Frontend and Backend: React.js, Node.js, Express, PHP, SQL, HTML, CSS, JS, Bootstrap, Git, Xampp

Graphic Design: Canva, Capcut, Piesart, Figma

Methodologies/Concepts: Full Stack Integration, REST APIs, UI/UX, AI-Assisted Development, Agile, Scrum, SDLC

Soft Skills: Critical Thinking, Creativity, Adaptability, Versatility, Attention to Detail, Continuous Learning, Accountability

Activities and Webinars Attended: Accenture Academy, DICT

AI Tools: Gemini, Perplexity, Claude, Deepseek
